

Lautaro Robles

Front End Developer

I am a University Technician in Software Development, specialized in Front-End development. I am passionate about the IT world and enjoy creating modern, accessible, and functional interfaces, combining design and technology to deliver high-quality user experiences. My focus is on continuous improvement, soft skills, teamwork collaboration, and problem-solving. I have several years of experience in Technical Support and Administration, working with user management systems (CRM), data handling (Microsoft Excel and Google Sheets), and ticket management platforms (Moica and Infocall3).

Professional Experience

N1 Technical Support | Indicom S.A.

Ciudad Autónoma de Buenos Aires | (2022-2025)

Multiskill Technical Support Representative (technical/commercial/administrative), responsible for problem-solving, customer service, and user retention. In this role, I developed key soft skills such as empathy, objection handling, and effective problem-solving.

Software Developer | Freelance

San Martín, Mendoza | (2023-Present)

Development of modern and responsive web applications using HTML, CSS, JavaScript, ReactJs and frameworks. These include applications for gyms, e-commerce platforms, and a ride-hailing service.

Skills
